Enterprise Profile

Xiamen Mibet New Energy Co., Ltd. is a joint-venture company with production bases located in Xiamen and Tianjin. Subsidiaries are set up in Japan and Australia. As a high-tech enterprise which provides advancing patented technology and high-efficiency service in renewable industry, Mibet Energy, equipped with varied intellectual property rights, specializes in the designing and manufacturing of solar PV mounting structures, including smart tracker system, ground mounting system, rooftop mounting system and floating PV system, and devotes itself to offering the most stable, reliable and cost-effective solar PV mounting solutions. Since establishment, Mibet Energy has spearheaded the global renewable energy market and become highly recognized by clients at home and abroad with its solar mounting structures being sold to more than 100 countries and regions, satisfying the comprehensive needs of different types of projects.

Led by an international R&D team, which consists of overseas returned scholars and professors in well-known universities, Mibet has launched a series of photovoltaic racking systems into PV market, such as MRac rooftop system, MRac ground system, MRac floating system, MRac smart tracking system, distributed pv mounting system, etc. Mibet's products have passed the ISO, TUV, UL, AS/NZS 1170 certification, etc, and become an industry leader in terms of the structural design and the system performance.

Besides, with strong marketing capability, Mibet not only has established a global marketing network, but also passed a series of certification, including the ISO9001:2008 quality system certification, ISO14001:2015 environmental management certification and OHSAS18001:2007 occupational health and safety management system certification. Our objective: leading the development of renewable industry and serving as top-class renewable enterprise!

MRac Roof Solar PV Mounting System Matrix I

Technical Parameters

System Name	MRac Roof Solar PV Mounting System Matrix I	Design Standard	AS/NZS 1170 、 DIN 1055 、 JIS C 8955: 2017
Installation Site	Flat Roof, Ground		International Building Code: IBC 2009
Foundation	Concrete Roof		California Building Code: CBC 2010
Tilt Angle	5 °, 10 °	Material	AL6005-T5 (Anodized)
Wind Load	60m/s	Fastener	SUS304 &Zinc-Nickel Alloy Electroplated Steel
Snow Load	1.6KN/m ²	Small Components	AL6005-T5 (Anodized)
Applicable Solar Module	Framed	Color	Silver or Customized
Panel Layout	Landscape	Warranty	10-Year Warranty

Overview

MRac Roof Solar PV Mounting System Matrix I is a non-penetration solution for flat rooftop. The system achieves high wind resistance performance and fast onsite installation with concrete ballast and patented structure design.

Save Installation Time With Highly Pre-assembled Structure

Customized design is available, flexible and multiple components can be chosen. Highly pre-assembled structure and no cutting or drilling on site save installation time and cost greatly.

Advantages

- > **High Durability Ensure the Structure Strength**
Professional structure design and high-density aluminum material ensure the stability and strength of the structure.
- > **Unique Matrix Design**
The matrix design further assures the stability of the whole system, and flexibly compatible with concrete block or ballast foundation.
- > **Reasonable Installation and Package Design**
Simplified components configuration lead to quicker installation and smaller package size, saving installation cost and freight.

MRac Roof Solar PV Mounting System Matrix II

Technical Parameters

System Name	MRac RMII	Design Standard	AS/NZS 1170 , DIN 1055 , JIS C 8955 : 2017,
Installation Site	Flat Roof, Pitched Roof		International Building Code IBC 2009
Foundation	Concrete Roof, Metal Roof		California Building Code CBC 2010
Tilt Angle	0-60°	Material	AL6005-T5(Anodized)
Wind Load	60m/s	Fastener	SUS304 &Zinc-Nickel Alloy Electroplated Steel
Snow Load	1.6KN/m ²	Small Components	AL6005-T5(Anodized)
Applicable Solar Module	Framed or Frameless	Color	Silver or Customized
Panel Layout	Portrait or Landscape	Warranty	10-Year Warranty

Overview

MRac Roof Solar PV Mounting System Matrix II is derived from RM I to meet different roof projects demands. Solar modules can be arranged with single or double rows of landscape or portrait orientation. Quick installation and stable structure are assured by the modular Patented design.

Advantages

- > **System Compatibility**
Components mostly pre-assembled in factory to assure quick and reliable installation on site. Suitable for different flat rooftop, and compatible to different types of solar modules.
- > **Unique Mudsill Design**
The mudsill can be fixed to flat roof or pitched roof with concrete foundation or steel foundation.
- > **Solar Module Layout Flexibility**
Both landscape and portrait solar module layout are suitable. Both single row and double rows layout can be achieved separately or combined.
- > **Adjustability**
Tilt angle can be adjustable

MRac Roof Solar PV Mounting System Matrix III

Technical Parameters

System Name	MRac RMIII	Design Standard	AS/NZS 1170 , DIN 1055 , JIS C 8955 : 2017,
Installation Site	Flat Roof, Open Land		International Building Code IBC 2009
Foundation	Concrete Foundation		California Building Code CBC 2010
Tilt Angle	0-60°	Material	Q235B(Hot-dip galvanized)
Wind Load	60m/s	Fastener	Zinc-Nickel Alloy Electroplated Steel & Q235B
Snow Load	1.6KN/M2	Small Components	AL6005-T5(Anodized)
Applicable Solar Module	Framed or Frameless	Color	Silver or Customized
Panel Layout	Portrait or Landscape	Warranty	10-Year Warranty

Overview

MRac Roof Solar PV Mounting System Matrix III is applied to various kinds of flat roof projects. Main components are made of hot-dip galvanized steel, with good performance of structure strength, stability and anti-corrosion, compatible with varied solar modules. Patented structure design guarantee quick installation to save construction cost.

Advantages

- > **System Compatibility**
Components mostly pre-assembled in factory to assure quick and reliable installation on site. Suitable for different flat rooftop, and compatible to different types of solar modules.
- > **Cost Efficiency**
Hot-dip galvanized steel assures the structure strength and lower cost for large-scale installation

Installation Guide

- 1

Make concrete bases with embedded bolts according to the solution drawing.
- 2

Fasten the plate on the concrete base.
- 3

Connect Back Support, Front Support and Inclined Support with the base.
- 4

Front & Back Support and Inclined Support installation has been completed.
- 5

Fasten the rail on Inclined Support.
- 6

Install the Beam Connector.
- 7

Beam installation finished.
- 8

Fasten the solar modules by end clamp kits and inner clamp kits.
- Complete installation.
